

# Orange

Grown mainly for processing and producing orange juice, Valencia oranges have seeds, which vary in number from zero to nine per fruit. Their excellent flavor and internal color make them desirable for fresh fruit markets as well. The fruit has an average diameter of 7-7.6 cm, and a piece of this fruit that weighs 96 g, has 45 calories and 9 g of sugar.

## Growing season:

February - June: Low

July and January: Medium

August - December: High

**Packing:** Cardboard and bags.

**Content:** 38 lb.

**Uses:** Food / Recommended for marinating meats / Drinks, such as cocktails, juices.  
Source of Vitamin C.  
Snack.
